

TRITON®

INTRODUCING THE NEW!

TRITON® SUPER DUTY

119-GALLON MODEL

The New Triton Super Duty (119-gallon, 500k BTU) is for larger businesses with the greatest hot water demand. Triton's built-in EcoNet® smart monitoring technology with integrated WiFi offers advanced diagnostics, preventive maintenance alerts, energy and water usage reports and scheduling capabilities. Plus, LeakGuard™, the most accurate all-inclusive leak detection and prevention system on the market, eliminates emergencies.

The Triton Family design was guided and influenced by plumbers and perfected by Ruud® Engineering to keep businesses up and running. This smart water heater was designed to be flexible so that it is the ideal solution for both replacement and new construction applications.

THE TRITON ADVANTAGE

- Eliminate the Emergency
- Easy Retrofit
- Built to Last

These products meet a stringent set of our company's internally defined sustainability standards.
